

Training program: HTML, XML, SQL with MySQL

1. Duration: 8 training days
 - a. HTML: 4 training days
 - b. MySQL: 4 training days
2. Mode of delivery: In-class
3. Program approach:
 - a. Training will be delivered through a mix of demonstration, presentation and hands-on.
 - b. Ideally each session will be 30-40% theory and 40-60% hands-on.
 - c. Hands-on will enabled through coding snippets, use cases and scenarios

Module-1: HTML & XML (Beginners to Intermediate)

Day#	Topic	Subtopic
Day1	Introduction to HTML	· Web Technologies History
		· HTML Introduction
		· Tags and Attributes
		· Head and Body Section Tags
		· Ordered Lists
		· Unordered Lists
Day2	Lists, Tables, Navigations	· Tables in HTML
		· Merging Cells and Rows
		· Navigations
		· Forms in HTML
Day3	Data Entry Forms & XML	· Input Fields
		· Select and Text Area
		· New Tags in HTML5
		· Introduction to CSS
		· Applying styles to HTML elements
		XML, XML Documents, Attributes
		XML DOM, XML-Tree
		XML Schemas, Namespace
Day4	Working with CSS	· Internal and external styles
		· Text, Font, colors, etc...

Module-2: SQL (Beginners to Intermediate)

Day#	Topic	Subtopic
Day 5	Introduction to SQL	• Introduction to Databases
		• Types of Databases
		• SQL and No SQL Database
		• Basic SQL Commands using MySql
		• Creating tables
Day 6	Tables, Columns	• Column rules
		• CURD operations on Rows
		• Insert/Update/Delete
		• Constrains in SQL Tables
		• Unique
Day 7	Constrains	• Primary Key
		• Check
		• Default
		• Foreign Key
		• Sub-Queries in SQL
		• Writing complex queries
Day 8	Sub-Queries, Joins	• Extracting data from Multiple tables
		• Type of Joins
		• Inner and Outer Joins
